# Welcome

---

Environmental Pollutants 2026 is a new annual conference focused on contaminants across environmental and food systems. It brings together researchers, regulators, and industry professionals to share knowledge, discuss current challenges, and strengthen collaboration across scientific and applied fields.

The conference takes place in Copenhagen on Monday, 28 September 2026. The programme includes keynote lectures, parallel presentations, poster presentations, and an industry exhibition.

The meeting provides an ideal setting to connect with a highly relevant scientific audience, showcase your organisation, and engage in meaningful professional exchange.

Topics covered in this year's parallel sessions include:

- ✓ Air pollution Ecotoxicology
- ✓ Non-target screening
- ✓ PFAS
- ✓ Plastics and microplastics
- ✓ Treatment of contaminated water

The interdisciplinary nature of the programme makes this meeting particularly relevant for suppliers, analytical service providers, and companies working with environmental monitoring, diagnostics, and contaminant research.
